

**SRI SASTHA ASSOCIATES**  
BUILDING YOUR VISIONS. CREATING REALITY.

a complete  
envelope solution  
from design  
to installation

**Pre-Engineered Building | Colour Coated Sheets | Sandwich Panels  
Z & C Purlins | Polycarbonate Sheets | Turbo Ventilators | Facade System  
Wooden Flooring | False Ceiling | UPVC Doors & Windows**

## 1. Pre Engineered Building

We provide structural steel fabrication for commercial, industrial, institutional and residential buildings. We fabricate in our factory facility and install on premises for complete service.

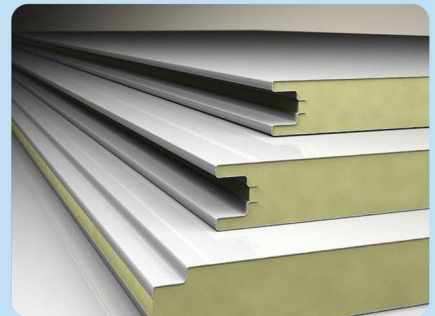

### Product categories

1. Build – up 'I' sections to make primary structural framing member (columns and rafters)
2. Cold formed Z & C sections for secondary members (Roof purlins, Eaves & Wall purlins)
3. Roll formed profiled sheeting ( Roof and Wall purlins)
4. Optional sub systems which includes Mezzanine floors, Crane runway, Roof platforms, Catwalks etc.,

## 2. Sandwich Panels

Fire – resistant insulated and airtight sandwich panels for external roof and internal walls for cold storage and thermal insulation.

## 3. Polycarbonate Sheets

### STRUCTURAL ROOF

We provide structural steel fabrication using multiwall and solid polycarbonate sheet such as Canopy, Car parking, Open to sky covering in shopping mall, apartments and residential buildings.

### DAY LIGHT PANELS

We provide the profiled day light panels for industrial building using embossed, compact (clear, opel white) solid polycarbonate sheets.

## 4. Ventilators

We provide wind driven turbo ventilators to create effective ventilation for different industries.

We provide industrial louvers and ridge ventilation for industrial roofs.

## 5. Polycarbonate Solar Dryer

We manufacture quality Polycarbonate Solar Dryers for fruits, vegetables, nuts, coconuts, spices etc., By drying the perishables in Solar Dryer the shelf life of the product is getting increased.

## 6. Polycarbonate Green House

We specialize in Polycarbonate Green House for Floriculture and Horticulture, Agriculture, Nurseries, Research and Educational facilities.

Polycarbonate Green House guarantee better light diffusion which is important for growing plants.

Polycarbonate Green House filters UV radiation which protect plants from harmful radiation.
